3.2	In Process	In Process
3.3	Implemented	In Process
3.4	Implemented	In Process
4.1	Implemented	Implemented
4.2	Implemented	Partially Implemented
4.3	Implemented	In Process
4.4	Implemented	In Process

- UDC:
 - Implemented: 11
 - In Process: 2
- OLAG:
 - Implemented: 4
 - In Process: 8
 - Partially Implemented: 1

Chapter 2

Several Aspects of Organizational Culture Need to Be Addressed by Management to Ensure Quality Care

Lack of Accountability Contributes to a Culture of Noncompliance

Record Keeping

Inmate Identification
at Pill Line

Return of
Medication

Narcotic
Accountability Logs

ICR Collection and
Record Keeping

Jump Bags

Unprotected Personal Health Information and Unlocked Biohazard Bins Still Pose a Significant Risk

REPORT

Pages 10-11

Chapter 3

New and Continuing Systemic Deficiencies Warrant Additional Recommendations

New and Continuing Systemic Deficiencies Warrant Additional Recommendations

- **Concern:** Inadequate charting, or documentation, of administered medications including controlled substances and insulin.
- **Recommendation:** Ensure that all administered medication is documented as required by internal policy, accreditation standards, and the Utah Controlled Substances Act.

New and Continuing Systemic Deficiencies Warrant Additional Recommendations

- **Concern:** Insufficient supervision and oversight of emergency medical technicians (EMTs) performing delegated tasks.
- **Recommendation:** Establish a system for the ongoing supervision and monitoring of EMTs delegates, including a well-defined reporting structure and consistent performance evaluations of the delegated tasks.

New and Continuing Systemic Deficiencies Warrant Additional Recommendations

-  • **Concern:** Implementation and compatibility issues associated with the electronic health record system.
- **Recommendation:** Continue to ensure that the electronic health record system is capable of generating data reports that demonstrate compliance with accreditation standards.
